

MEDIA VAULTING

Ensuring Business Continuity

WHY DATA PROTECTION MATTERS

- 40% of companies that fail to recover data from a disaster within three days go out of business.
- An increasing number of risks threaten critical business data.
- Corporate information lifecycle controls and accountability are now a mandate.

ENSURING BUSINESS CONTINUITY

Thousands of organisations trust Iron Mountain to backup and protect their computer data off site, and have for more than 30 years. Iron Mountain's Media Vaulting solution lays the foundation for business continuity, with the most reliable data protection and recovery available.

SAFEGUARDING CRITICAL BUSINESS DATA

Iron Mountain Media Vaulting delivers unmatched data protection. Media Vaulting stores your critical backup data securely – off-site, off-line and out-of-reach – safeguarded by an experienced, neutral third party with sites spanning 170 global markets. As a result, a copy of your data is always shielded from natural disasters, utility outages, viruses and worms, internal technology failures, and human errors and sabotage.

Iron Mountain Media Vaulting also meets or exceeds all industry standards for eliminating unnecessary exposure to risk and ensuring data security and privacy. Our consistent processes and stringent controls guarantee safe data handling, restricting data access exclusively to authorised personnel, yours and ours.

Iron Mountain invests in state-of-the-art facilities, transport vehicles and equipment, and technology – and rigorously screens and trains employees. Our goals are preventing data loss, defending your data from harm, and accommodating your backup data as it grows in volume.

“Companies must have a secure and reliable plan for safeguarding their critical data from both natural disasters and human threats. Iron Mountain has over 30 years of experience in the data protection business, delivering a comprehensive suite of Media Vaulting services, data backup and rapid recovery services.”

*– John McCarthy, Group Vice President,
Worldwide Storage Research, IDC*

ENABLING DISASTER RECOVERY AND BUSINESS CONTINUITY

With Iron Mountain Media Vaulting, you control your data, with the power to recover what you need, on-demand, to resume business. Your data is continuously accessible for monitoring and management through an easy-to-use Web interface and available for restoration through fast media delivery – 24x7x365.

Our Web-based customer interface, provides complete, accurate, real-time media visibility and control to your authorised personnel – anytime, any place. As a result, you can quickly and easily monitor and manage your media online to expedite your company’s standard rotational practices and special media requests.

Iron Mountain’s worldwide resources accelerate recovery both locally and globally, allowing you to quickly recommence business. Customer support is always a phone call away. And Iron Mountain’s fleet of state-of-the-art vehicles and specially chartered ground and air transport can rapidly deliver your data to any location you stipulate.

Most important, Iron Mountain Media Vaulting services are proven – in more than 150 successful disaster recoveries and more than 10,000 disaster recovery tests.

PROVIDING ACCOUNTABILITY FOR CORPORATE INFORMATION

Iron Mountain is uniquely capable of providing full accountability for your data – and helping you achieve complete protection and demonstrate accountability to corporate stakeholders and the government.

Iron Mountain’s internal vault management system continuously monitors the location of your media during transport and storage. Using the Web portal to access this system, your authorised personnel can easily audit your media library any time, in real time – and generate up-to-date, accurate status reports – both current and historical – for any and all media in Iron Mountain’s care. The system also proactively spots any rotational discrepancies, enabling immediate resolution.

THE INCREASING THREATS TO DATA

83% of the companies studied in Deloitte & Touche’s 2004 Global Security Survey reported security breaches – with the greatest increase in the area of viruses and worms. This is more than double the number reported the year before.

Iron Mountain is the leader in off-site data protection and disaster recovery. With more than 30 years of experience and service to over 32,000 customer accounts, we have developed – and can help you implement – best practices for data backup, protection, and recovery. With Iron Mountain Media Vaulting, you can work proactively to ensure your company’s business continuity.

A ONE-STOP RESOURCE

In addition, Iron Mountain offers comprehensive services including:

- **Media Services.** You can purchase data products, including media and racks, directly from Iron Mountain – quickly and conveniently. When you need to move your tape library, Iron Mountain can inventory, pack, transport and set it up – with full data protection at each step. For companies with remote offices and limited IT staff, Iron Mountain provides a range of services – from managing rotation to performing backups.
- **Secure Shredding.** Using advanced equipment and highly secure processes, Iron Mountain can destroy digital media as well as paper records, and certify the destruction – ensuring security, privacy, and compliance for confidential information.
- **Consulting Services.** Iron Mountain professionals with knowledge of specialised industries such as healthcare, pharmaceuticals, financial services, and energy can help you address the evolving challenges of electronic and hardcopy records management and retention.
- **Electronic Vaulting.** Iron Mountain offers a full range of state-of-the-art electronic vaulting services for automatically backing up data on servers and PCs online and vaulting it in off-site facilities with top-of-the-line security.

We also offer:
